# Progress Report - Jiajun Huang

What I have done

implementation of AD-NeRF

- completed the headpose estimation algorithm for AD-NeRF, starts working on the NeRF part

other research

- read more papers on speech animation

Intel-PA

- discussed further directions with other students, assigned to build a minimal decision tree from data on NHS website

What I intend to do next

- continue working on AD-NeRF, get the pipeline running in the next 2 weeks
- look into DeepSpeech, which is both useful for my research and the project
- work on building the decision tree after kavi have crawled the NHS website

- deal with the probationary review(if scheduled)
